TIMBER BEAM INSPIRATION
2024 COLLECTION

TIMBER BEAMS

Here at Stone UK we strongly believe in reusing and repurposing materials where possible. We use innovation techniques to repurpose reclaimed timber beams to create the perfect option for your fire surround or ceiling joists etc.

Our beams can also be used to make decorative lighting features!

Osmo Topoil Clear Matt

Briwax Original 400g

Osmo Wood Filler Putty 250g

Osmo Wood Filler Paste 100g

Briwax Original Liming Wax White 220g

TIMBER CARE

To keep your wood looking as good as the day you bought it, we would highly recommend taking the following steps:

- 1 - If you plan to use your timber purchase inside, make sure that you first acclimatise it to its environment. This is to prevent cracks, splits and shrinkages.
- 2 - Avoid placing your wood near sources of heat or near uncovered windows as this can damage or fade the wood.
- 3 - Dust often. Airborne particles can scratch the surface of your wood.
- 4 - Clean often and well using a slightly damp cotton material and gently wipe.
- 5 - Avoid using harsh chemicals like bleach or strong acids on timber; instead, use mild, timber-safe cleaning agents
- 6 - Use liquid polish to hide abrasions.
- 7 - If the wood begins to smell, leave outside in a dry area or lightly dust in baking soda to remove any unpleasant odours.
